DRUID LANYARD

WORK POSITION LANYARD

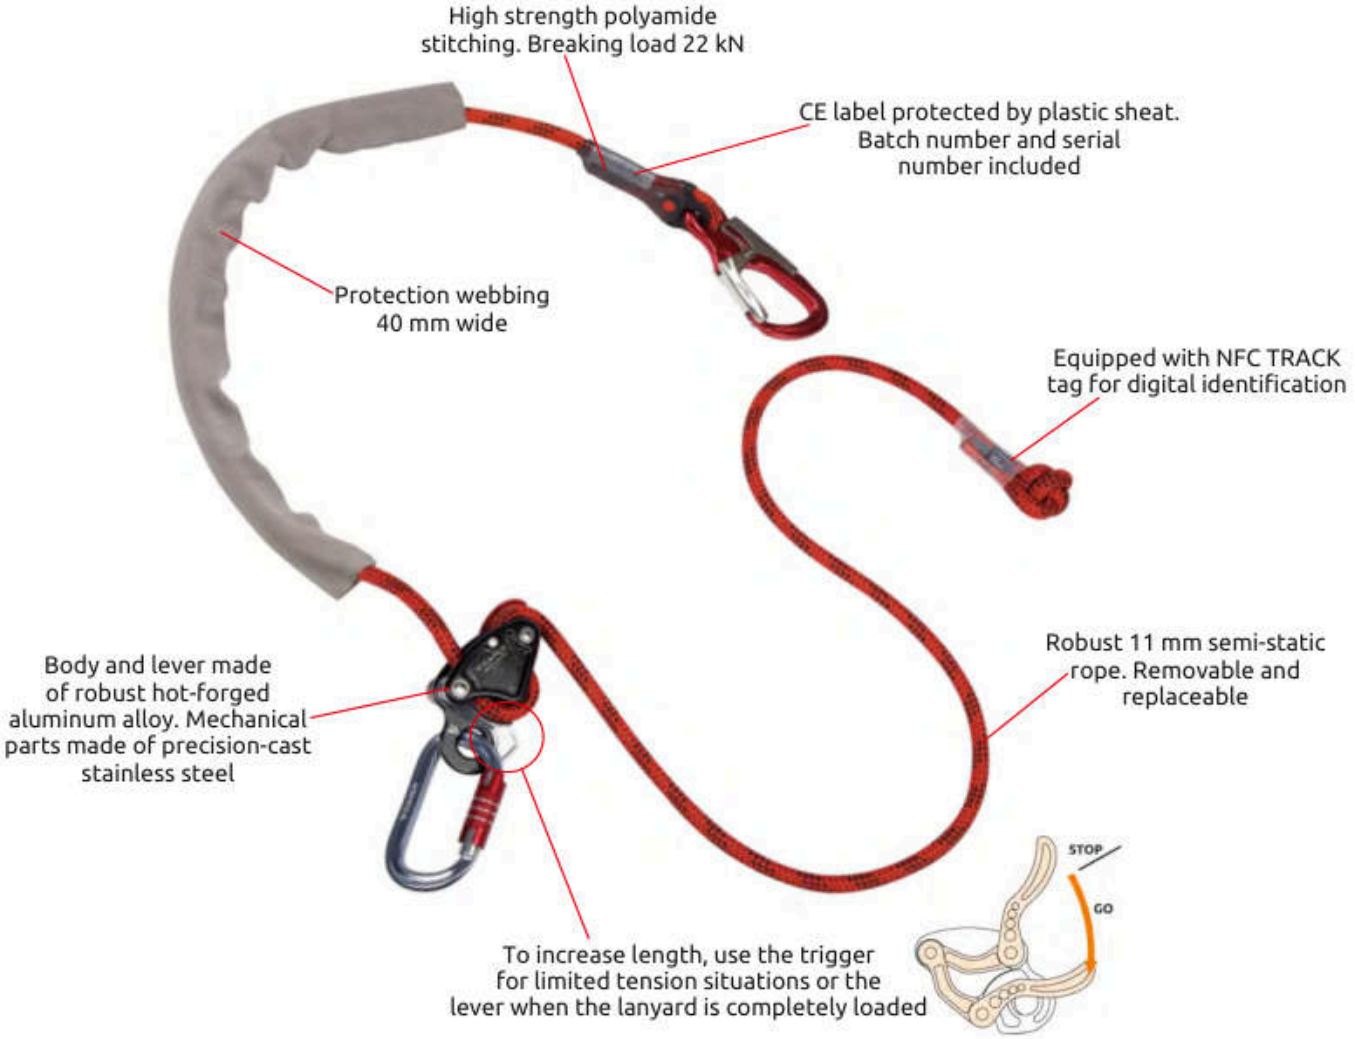

NFC - HF RFID | PAT. PEND

Ref. 3517

Incredibly versatile adjustable lanyard thanks to the many certifications:

- EN 358 work positioning lanyard,
- EN 795/B anchoring device,
- EN 795/C temporary lifeline,
- EN 353-2 fall arrester,
- EN 341/2A emergency evacuation device,
- EN 12841/C rope access descender.

Constructed from robust 11 mm semi-static rope with an innovative mechanical adjuster that allows for precise and quick adjustment even while under tension.
The locking cam system uses an innovative graduated design for smooth action on the rope and the absorption of energy from small shocks and dynamic loads with a slight amount of rope slippage.
Adjustment is simple and intuitive. To reduce length, simply pull the rope through the device. To increase length, use the trigger for limited tension situations or the lever when the rope is completely loaded.
Rope is removable and replaceable.
Equipped with NFC TRACK tag for digital identification.

NFC Track | G.T.S.

C.A.M.P. presents a **complete solution for the digital management of PPE**, both for allocation to users and for periodic inspections: the **NFC TRACK hardware tags on the products** work seamlessly with the **G.T.S. - Gear Tracking System software** to make the system very intuitive and easy to use.

NFC TRACK chips are installed on many C.A.M.P. products (harnesses, helmets, Retexo lanyards). They **can also be attached directly on any PPE** by the user, so that the user can assign the PPE data to the chip by means of the C.A.M.P. G.T.S.

NFC (Near Field Communication) technology is now present on most smartphones and used every day for smart payments. Today, it also represents the future for the individual identification of products.
The **HF RFID** (High Frequency Radio Frequency Identification) communication system on which NFC is based allows the C.A.M.P. NFC TRACK to be easily read using any latest generation smartphone or for professionals using a PC reader.

NFC TRACK chip installed!

-G.T.S.- GEAR TRACKING SYSTEM

G.T.S. allows professionals to easily manage PPE both via the smartphone app (available on Play Store and Apple Store) and from a PC via the web app (campgts.it).

Two different packages allow for carrying out periodic inspections and also for managing the company allocation of PPE to its employees.

The database of **G.T.S. includes the technical information of all C.A.M.P. products** for work at height.
